

IFCLA CONFERENCE 2021

*Taking place online and onsite
from Barcelona
on 30 September and 1 October*

IT REVOLUTIONS AND LEGAL THREATS AND COUNTERMEASURES

Trans-border commerce and current challenges (from Brexit to IoT privacy related issues, as well as data transfers in and out of China and other Asian countries); the latest developments of the Cybersecurity Industry, e.g. its impact on trade secrets; Blockchain applications and use cases in various industries and related EU initiatives; as well as Ethics, Governance and Legal implications including IP Protection in Artificial Intelligence are some of the cutting-edge topics in the next IFCLA conference.

IT Law evolves rapidly to adapt to the new scenarios resulting from the industrial revolution in which technology plays a leading role. Its practice requires extensive technological knowledge and superior technical-legal qualifications from the legal professional. In this context, sharing knowledge and experiences among professionals from different countries is the way to be prepared to effectively face the challenges.

Join us to discuss the hot topics in technology law online and onsite from one of the most vibrant cities of Spain.
